

Step1 select MKT

## Information Selection

Select Market

CTX

CIQ FILE FOR CTX:

CTX-VZ\_CIQ\_Ver\_1.3.64\_20220715.xlsx

Select Option

eNB

Site eNodeB

139650

Select File to be generated:

☒ pnp

☒ enb

☒ cell

- Select a Market
- Select a site
- Run the app

Data Frame with the information will be displayed

	Market	USM	NE Version	Release Version	eNB Name	Nokia eNB ID	Data Frame with the information will be displayed		Cell ID	Cell Source	cell-identity	administrative-state	Lat	Long	TAC	PCI	RACH	Band Name

Step2 select two options  
a) enb or b) cell

Step2 if you select b,  
then only one eNodeB  
will be selected, no  
multiple

CREATE PNP

STARTING PROCESS FOR SELECTED SITES: ['139650']

BUILDING SITE: 139650

[DOWNLOAD PNP FILE\(S\)](#)

Step4, click start, but this button will be active if you have selected a market, an option, and inside the option its required information, and one of three files. Else this button cannot be active.

Step5 buttons with the download for each of the elements.

Step6 We can add an additional button to reset the process or restart it.

Login information, for this I will need to create a log file, it can be csv, with the user name, email, date and the things that were done , example added.
